EDUCATION

Ramaiah Institute of Technology

B.E. in Computer Science and Engineering (CGPA: 9.06)

Bangalore, India

2023 – 2027

Shiksha Niketan Senior Secondary School

Class 12 (Percentage: 96.4%)

Jammu, India

2022

TECHNICAL SKILLS

Languages/Frameworks: C++, Python, JavaScript, **React**, **Node.js**, **Express.js**, **RestAPIs**

Tools: Git/Github, Postman, Antigravity, Canva, **MongoDB**, **SQL**

Coursework: DSA, OOP, Operating Systems, DBMS, Computer Networking

EXPERIENCE

MSRIT | *Intern (On-site)*

Aug. 2024

Developed multiple web applications using the MERN stack, including several small-scale projects to enhance development proficiency. Built a full-stack e-commerce platform with integrated frontend and backend functionality.

Web Development Intern

June 2024 – July 2024

Unified Mentor Pvt. Ltd.

- Built and deployed multiple web applications including a To-Do application and a Gym Management System to strengthen full-stack development skills
- Completed daily development tasks via company portal
- Worked on small-scale feature implementations and bug fixes across internal projects

PROJECTS

Attainers 📄 | *React, Node.js, Express, MongoDB, Clerk, Tailwind*

2025

- Built a MERN-based learning platform (courses, tests, PDFs, PYQs, blogs) with scalable **REST APIs**
- **Developed a mock test engine** with timer, negative marking, real-time evaluation, and persistent user analytics
- **Implemented role-based admin dashboard** with Clerk authentication, full CRUD + media pipelines, and backend systems including **PDF-to-test parsing**, secure file delivery, and cron-based jobs

Ankur School (Management System) 📄 | *React, Node.js, Express, MongoDB, JWT, Tailwind*

2025

- Built a full-stack MERN-based school management system handling admissions, payments, content, and student records with scalable REST APIs
- **Implemented secure authentication system** using JWT with role-based access control for admin workflows and protected routes
- **Designed end-to-end admission & payment pipeline** integrating PhonePe gateway, webhook handling, and automated student onboarding with MongoDB and GridFS-based file storage

Dragon Fruit Disease AI Suite 📄 | *ConViTx, YOLOv8, VectorDB, LLM, RAG*

2025

- Built a **full-stack AI platform** with a hybrid **CNN-ViT (ConViTx)** for 6-class disease classification (**Grad-CAM** explainability), **YOLOv8** lesion detection with 0–4 severity scoring, and quality grading — served via **REST APIs**
- **Designed Multimodal VQA (DragonFruitVQA)** fusing ConViTx vision features with a **Bi-GRU text encoder** for free-text crop image queries. **ResNet50 Quality Grader** — **classifies** fruit as Fresh, Mature, Defect, or Immature.
- **Built RAG advisory chatbot (Agrobot)** auto-injecting vision model output (disease + confidence + severity) as context; retrieves chunks from a **VectorDB of research paper embeddings** and grounds **Anthropic-model** responses — zero manual input needed

ACHIEVEMENTS & POR

Honors & Awards: CTF (MSRIT) 26: **Runner-up (2nd Position)**; TECH CHRONICLES: **3rd Position**; 100% fully funded scholarship granted by AICTE to pursue B.E in CS at Ramaiah Institute of Technology, Bangalore
